TEXT :

Water is the "life blood" of our earth. It is in every living thing. It is in the air . It runs through mountains and valleys. It forms lakes and oceans. Water is every where.

Nature has a great water system. Rain water finds its way to streams and rivers. Rivers lead to the ocean .At the mouths of the rivers, fresh water joins the salt water of the ocean.

Here, at the mouth of a river, there is much important plant and animal life. Pollution destroys this life,however. We have to clean our streams and rivers. Man has to work with nature not against it.

« Louise Huston Massoud »

Section one :Reading comprehension:(08pts)

A) Read the text carefully and answer these questions : (03pts)

- 1-How many paragraphs are there in the text?
- 2-In which paragraph it is mentioned " man has to work with nature not against it ."
